

International Journal of
CONTROL

Formerly "Journal of Electronics and Control"

PERIODICAL

**UNIVERSITY OF HAWAII
LIBRARY**

Editor: J. THOMSON

Editorial Board:

France	- -	Professor P. AIGRAIN
Holland	- -	Professor H. B. G. CASIMIR
U.K.	- -	A. T. FULLER
Germany	- -	W. KLEIN
U.S.A.	- -	J. C. LOZIER
India	- -	R. P. WADHWA
U.K.	- -	Professor J. C. WEST

Volume VII. First Series

January 1968 to June 1968

CONTENTS OF VOL. VII. (Nos. 1-6)

(FIRST SERIES)

NUMBER 1—JANUARY

	Page
Non-linear properties of discrete-continuous feedback control systems with signal dependent sampling. Part II. Non-linear properties. By K. E. TAIT, School of Electrical Engineering, University of New South Wales, Sydney, Australia	1
Frequency response analysis of two-dimensional non-linear symmetrical and non-symmetrical control systems. By P. N. NIKIFORUK and B. L. M. WINTONYK, Division of Control Engineering, Mechanical Engineering Department, University of Saskatchewan, Saskatoon, Canada.....	49
Modified equivalent gain analysis of non-linear systems with Gaussian noise. By J. A. HEINEN and S. H. WU, Department of Electrical Engineering, Marquette University, Milwaukee, Wisconsin.....	63
Spectral densities of gated stationary random signals. By S. G. LOO, Department of Electrical Engineering, Monash University, Clayton, Victoria, Australia	73
Evaluation of impulse response of linear systems by using Legendre polynomials. By H. B. KEKRE, Department of Electrical Engineering, Indian Institute of Technology, Bombay 76, India.....	81
Further comment on "A method of solving time-varying differential equations". By J. MCGHEE, Department of Electronic Science and Telecommunications, University of Strathclyde, Glasgow, Scotland.....	95
Reply to 'Further comment'. By Y. V. VENKATESH and B. L. DEEKSHATULU	99

NUMBER 2—FEBRUARY

Theory of stability and control for distributed parameter systems (a bibliography). By K. P. C. WANG, Department of Engineering, University of California, Los Angeles, California.....	101
Stability of a class of non-linear time-varying systems. By M. D. SRINATH, M. A. L. THATHACHAR and H. K. RAMAPRIYAN, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India.....	117
On final value control. By C. E. SEAL and A. R. STUBBERUD, University of California, Los Angeles, California.....	133
On the Hamilton-Jacobi equation of differential games. By R. CHATTOPADHYAY, University of California, Los Angeles, California.....	145

	Page
The transformer analogue Bode simulator (TABS). By B. RAMASWAMI and P. VENKATA RAO, Department of Electrical Engineering, Indian Institute of Technology, Madras, India.....	149
Liapunov functions for feedback systems containing a single time-varying non-linearity. By J. A. WALKER, Department of Mechanical Engineering and Astronautical Sciences, Northwestern University, Evanston, Illinois.....	171
Second-order and second-variation methods for determining optimal control: A comparative study using differential dynamic programming. By D. H. JACOBSON, Centre for Computing and Automation, Imperial College of Science and Technology, University of London.....	175
Research note:	
On the step response of all-pole third-order transfer functions. By R. HARIHARAN and S. N. RAO, Department of Mechanical Engineering, Indian Institute of Science, Bangalore 12, India.....	197

NUMBER 3—MARCH

Analogue computer study of some fundamental control relations involving alternators and diesel engines. By EARL D. EYMAN, Department of Electrical Engineering, University of Iowa, Iowa City, Iowa 52240.....	201
Output autocorrelation functions of smooth and hard limiters. By M. C. CHENG, Mathematics Department, University of Adelaide.....	223
Output autocorrelation functions of biased full-wave smooth and hard limiters. By M. C. CHENG, Mathematics Department, University of Adelaide	241
A computational way of determining stability of periodic linear systems. By E. J. DAVISON, Department of Electrical Engineering, University of Toronto, Canada	247
Optimal control when some of the state variables are not measurable. By V. V. SARMA and B. L. DEEKSHATULU, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India	251
Sign conventions for generalized block diagrams. By A. G. J. MACFARLANE, Control Systems Centre, University of Manchester, Institute of Science and Technology, Manchester.....	257
The frequency response and jump-resonance criteria of non-linear control systems. By I. SURYANARAYANA MURTY, G. KRISHNA and B. L. DEEKSHATULU, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India	265
Recursive filtering for systems with small but non-negligible non-linearities. By H. W. SORENSON and A. R. STUBBERUD, University of California, Los Angeles, California, U.S.A.....	271

	Page
A study of effects on optimal control systems due to variations in plant parameters. By S. Y. CHAN, Department of electrical Engineering, San Diego State College, San Diego, California, and K. CHUANG, Department of Electrical Engineering, The University of Michigan, Ann Arbor, Michigan.....	281

Research note:

On the extension of the W.K.B.J. approximation to non-linear time-dependent systems. By B. V. DASARATHY and P. SRINIVASAN, Department of Mechanical Engineering, Indian Institute of Science, Bangalore 12, India.....	299
--	-----

 NUMBER 4—APRIL

The stability of integral pulse frequency modulation Systems. By E. A. KING-SMITH and J. R. CUMPSTON, Electrical Engineering Department, University of Melbourne, Australia.....	301
--	-----

Identification of impulse response of linear systems and synthesis of system model. By H. B. KEKRE, Indian Institute of Technology, Bombay, India and G. S. GLINSKI, University of Ottawa, Ottawa, Canada.....	317
--	-----

The theory of linear continuous systems. II. By R. F. HOSKINS, Advanced Development Laboratory, A.E.I., Blackheath, London, S.E.3.....	333
--	-----

On the relation between z transforms and a transform technique for time-varying, linear systems. By K. KAWAMURA and A. W. NAYLOR, Systems Engineering Laboratory, Department of Electrical Engineering, University of Michigan, Ann Arbor, Michigan.....	349
--	-----

On the use of certain transformation techniques in the study of non-linear systems. By B. V. DASARATHY and P. SRINIVASAN, Department of Mechanical Engineering, Indian Institute of Science, Bangalore 12, India.....	361
---	-----

Absolute stability of systems with multiple non-linearities. By M. D. SRINATH, M. A. L. THATHACHAR and H. K. RAMAPRIYAN, Department of Electrical Engineering, Indian Institute of Science, Bangalore 12, India.....	365
--	-----

Some sufficient conditions for the stability of a linear time-varying system. By E. J. DAVISON, Department of Electrical Engineering, University of Toronto, Canada.....	377
--	-----

Minimum time control by time interval optimization. By VINCENT H. LARSON, Northwestern University, Evanston, Illinois.....	381
--	-----

Research note:

Equilibrium of certain types of non-linear systems. By N. SREEDHAR and S. N. RAO, Department of Mechanical Engineering, Indian Institute of Science, Bangalore 12, India.....	395
---	-----

NUMBER 5—MAY

- Parametric estimation of multivariable continuous systems of known structure. By ROBERT E. KING, Life Sciences Laboratory, Riverside Research Institute (formerly Columbia University Electronics Research Laboratories), 632 West 125th Street, New York, N.Y. 10027..... 401
- A variable frequency square wave generator with single time constant circuit. By P. C. SEN and A. K. MUKHERJEE, Jadavpur University, Calcutta, India 409
- Synthesis of sub-optimal feedback controls for a class of distributed parameter systems. By J. H. SEINFELD, Chemical Engineering Laboratory, California Institute of Technology, U.S.A., and K. S. P. KUMAR, Department of Electrical Engineering, University of Minnesota, U.S.A..... 417
- Stability criteria for non-stationary feedback systems. By J. L. WILLEMS, University of Gent, Belgium 425
- Optimal control and filtering of linear stochastic systems. By S. T. ARIARATNAM and N. K. LOH, University of Waterloo, Waterloo, Ontario, Canada 433
- Connection theorems in non-convex programming. By S. G. BANKOFF, Department of Chemical Engineering, Northwestern University, Evanston, Illinois 447
- An approximation method for nearly linear, first-order stochastic differential equations. By H. J. PAYNE, The University of Southern California, Los Angeles, California 451
- Extensions of quadratic minimization theory. I. Finite time results. By J. B. MOORE and B. D. O. ANDERSON, Department of Electrical Engineering, University of Newcastle, New South Wales, 2308, Australia 465
- Extensions of quadratic minimization theory. II. Infinite time results. By B. D. O. ANDERSON and J. B. MOORE, Department of Electrical Engineering, University of Newcastle, New South Wales, 2308, Australia 473
- On sensitivity in multivariate non-stationary systems. By WILLIAM A. PORTER, Systems Engineering Laboratory, Department of Electrical Engineering, The University of Michigan 481
- Active RC synthesis using a fractional gain amplifier. By P. K. RAJASEKARAN and S. N. RAO, Department of Mechanical Engineering, Indian Institute of Science, Bangalore 12, India 493
- On the response of time dependent systems reducible to equivalent time invariant systems. By B. V. DASARATHY and P. SRINIVASAN, Department of Mechanical Engineering, Indian Institute of Science, Bangalore 12, India..... 497

NUMBER 6—JUNE

- Mappings of the state space into the complex plane and their use in multivariable systems analysis. By A. G. J. MACFARLANE and N. MUNRO, Control Systems Centre, University of Manchester Institute of Science and Technology, Manchester 1..... 501

	Page
Optimal controller design for minimum trajectory sensitivity. By J. Y. S. LUH and E. R. CROSS, School of Electrical Engineering, Purdue University, Lafayette, Indiana.....	557
Analysis of cyclic reactor behaviour by the equivalent gain technique. By D. M. BORTH and T. Z. FAHIDY, Department of Chemical Engineering, University of Waterloo, Ontario, Canada	569
A frequency stability criterion for a class of non-linear sample-data systems with pure delay. By J. I. SOLIMAN, Department of Mechanical Engineering, Queen Mary College, Mile End Road, London, E.1, and H. KWON, Group Research Laboratory, Automation Group, The Plessey Co. Ltd., Sopers Lane, Poole, Dorset.....	579
Stability of linear time-varying systems. By N. SREEDHAR and S. N. RAO, Department of Mechanical Engineering, Indian Institute of Science, Bangalore 12, India.....	591
Research note :	
A note on Bendixson's criterion. By N. SREEDHAR and S. N. RAO, Department of Mechanical Engineering, Indian Institute of Science, Bangalore 12, India.....	595
Book notices.....	599
Subject index	601
Author index	603
